

An additional dose is administered to improve moderately to severely immunocompromised people's immune response to their initial two-dose series of the Pfizer or Moderna COVID-19 vaccine.

Who can get an additional dose of the Pfizer and Moderna COVID-19 vaccine?

Did you receive 2 doses of the Pfizer COVID-19 vaccine over 28 days ago?

Yes

Are you moderately or severely immunocompromised?*

Yes

Are you 12 or older?

Yes

You can get an additional dose of the Pfizer COVID-19 vaccine.

Did you receive 2 doses of the Moderna COVID-19 vaccine over 28 days ago?

Yes

Are you moderately or severely immunocompromised?*

Yes

Are you 18 or older?

Yes

You can get an additional dose of the Moderna COVID-19 vaccine.

You should use the same COVID-19 vaccine (Pfizer or Moderna) that you received initially for your additional dose. Unlike a COVID-19 booster shot, the Pfizer and Moderna vaccines are not interchangeable for an additional dose.

People should talk to their health care provider about whether a booster shot is appropriate for them.

At this time, an additional dose is not recommended for people who received the J&J COVID-19 vaccine.

*Scan the code for more on immunocompromised conditions, from the CDC.
