Prevent RESPIRATORY ILLNESS—it’s in your hands!

- Cover your mouth and nose with a tissue when you cough or sneeze. If you don’t have a tissue, cough or sneeze into your upper sleeve or elbow, not your hands.

- Wash your hands often with soap and water. If you don’t have soap and water, use a hand sanitizer that is at least 60% alcohol based.

- Clean and disinfect frequently touched surfaces.

- Try not to touch your face with unwashed hands.

- Don’t touch or shake hands with people who are sick.

- Stay home when you’re sick, and keep your children home when they’re sick.
