# Coronavirus: summary of persons being monitored, persons under investigation, and cases

Data through Jul 4, 2020 verified as of Jul 5, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of a airline/ship contact investigation

Total reports	79,217
Total persons of high, medium, or unknown risk	75,527
High/medium/unknown risk still being monitored	17,060

Persons tested: includes PCR and antigen test results received by the Department of Health from the state public health laboratory (BPHL), as well as commercial and hospital laboratories

Total tested	2,202,095
Positive	200,111
Negative	2,000,088
Inconclusive	1,896
Awaiting testing	1,508

Contact is pending 77,721

Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.

#### Coronavirus: cases and laboratory testing over time

Data through Jul 4, 2020 verified as of Jul 5, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

#### Laboratory testing for Florida residents and non-Florida residents over the past 2 weeks

#### Number of people tested per day

These counts include the number of people for whom the department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

#### Number and percent of positive labs

#### The percent of positive results ranged from 8.98% to 18.50% over the past 2 weeks and was 17.02% yesterday.

These counts include the number of people for whom the department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

#### Percent positivity for new cases

#### The percent of positive results ranged from 7.76% to 15.98% over the past 2 weeks and was 15.04% yesterday.

This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

Data through Jul 4, 2020 verified as of Jul 5, 2020 at 09:25 AM
