

# COVID-19: summary of persons monitored, persons tested, and cases

Data through Sep 3, 2020 verified as of Sep 4, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

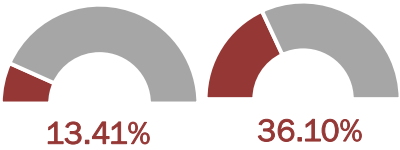

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of a airline/ship contact investigation

Total reports	214,161
Total persons of high, medium, or unknown risk	210,501
High/medium/unknown risk still being monitored	14,924

Persons tested: includes PCR and antigen test results received by the Department of Health from the state public health laboratory (BPHL), as well as commercial and hospital laboratories

	Florida residents	Non-Florida residents
Total tested	4,727,240	19,832
Positive	633,060	7,151
Negative	4,087,139	12,657
Inconclusive	7,041	24
Awaiting testing	3,527	30

Cumulative percent positivity (based on positive and negative results from March 1 - present)

Cases: people with positive PCR or antigen test result

Total cases	640,211
Florida residents	633,060
Non-Florida residents	7,151
Type of testing	
Florida residents	633,060
Positive by BPHL/CDC	22,662
Positive by commercial/hospital lab	610,398
PCR positive	623,160
Antigen positive	9,900
Non-Florida residents	7,151
Positive by BPHL/CDC	244
Positive by commercial/hospital lab	6,907
PCR positive	6,833
Antigen positive	318

Characteristics	
Florida residents hospitalized	39,667
Florida resident deaths	11,750
Non-Florida resident deaths	153

Hospitalized counts include anyone who was hospitalized at some point during their illness. It does not reflect the number of people currently hospitalized.

More information on deaths identified through death certificate data is available on the National Center for Health Statistics website at [www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm](http://www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm).

Risk factors for Florida residents	
Traveled	4,892
Contact with a known case	213,072
Traveled and contact with a known case	5,196
Neither	409,900
No travel and no contact	76,116
Travel is unknown	247,525
Contact is unknown	152,066
Contact is pending	165,038

Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.

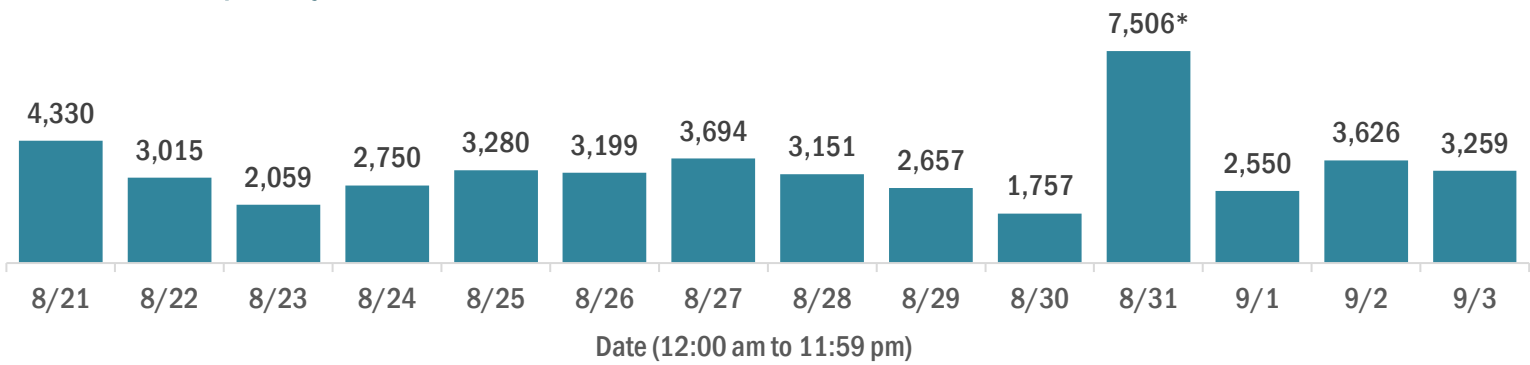

# COVID-19: cases and laboratory testing over time

Data through Sep 3, 2020 verified as of Sep 4, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

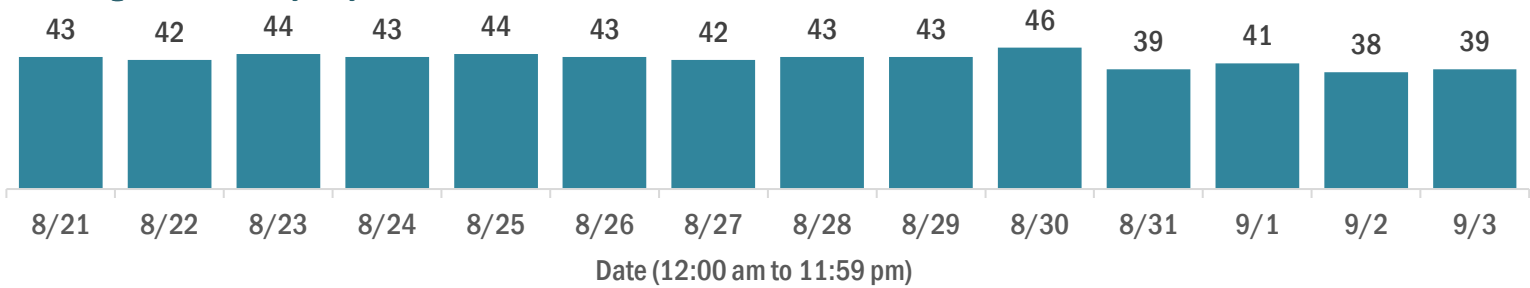

## Cases in Florida residents per day for the past 2 weeks

### Number of cases per day

\* Includes a one-time historical data submission of 3,815 cases from a large laboratory. The number of new cases on 8/31 excluding the historical data submission was 3,691. See graph on next page for excess cases by specimen collection date.

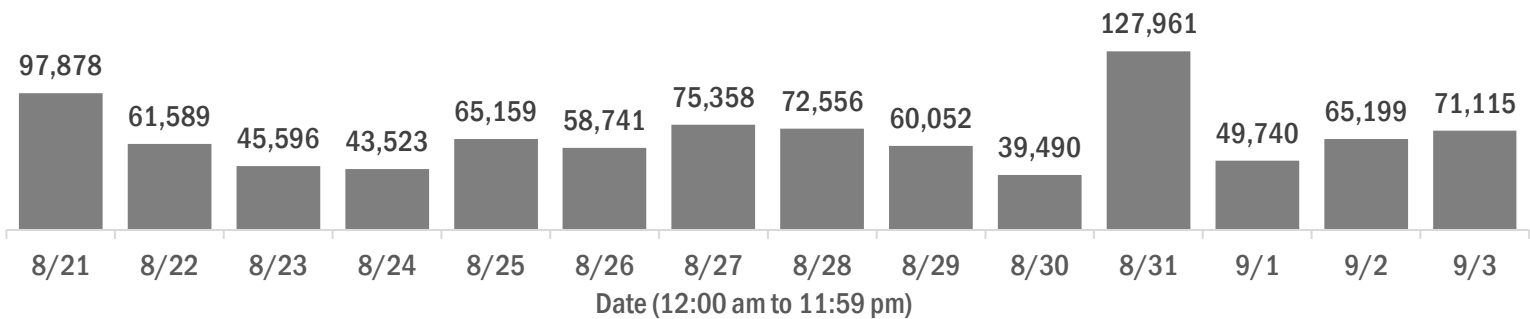

### Median age of cases by day

## Laboratory testing for Florida residents over the past 2 weeks

### Number of Florida residents tested per day

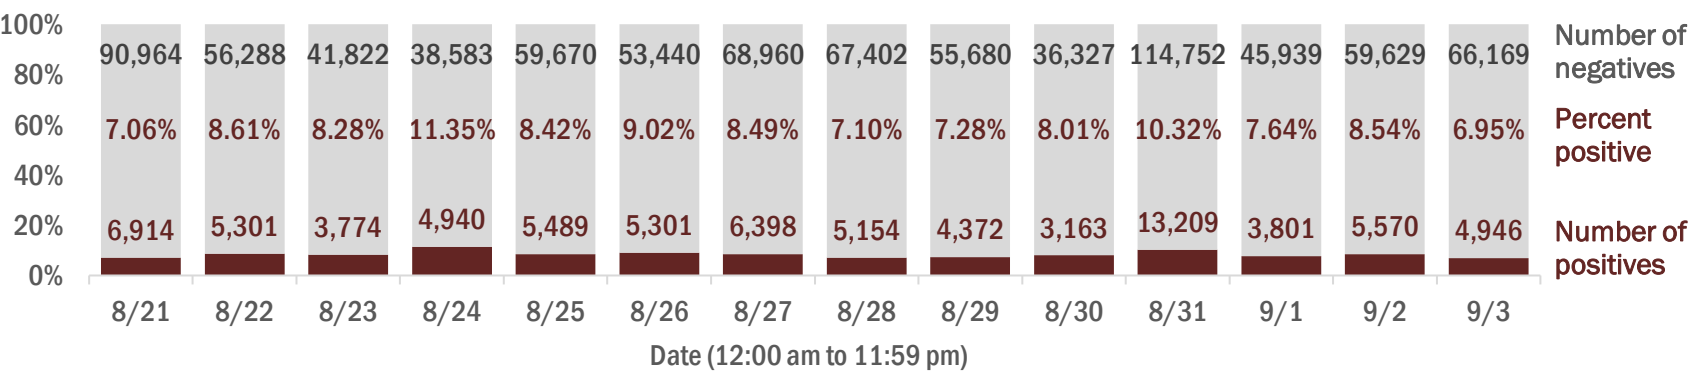

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

### Number and percent of Florida residents with positive test results

The percent of positive results ranged from 6.95% to 11.35% over the past 2 weeks and was 6.95% yesterday.

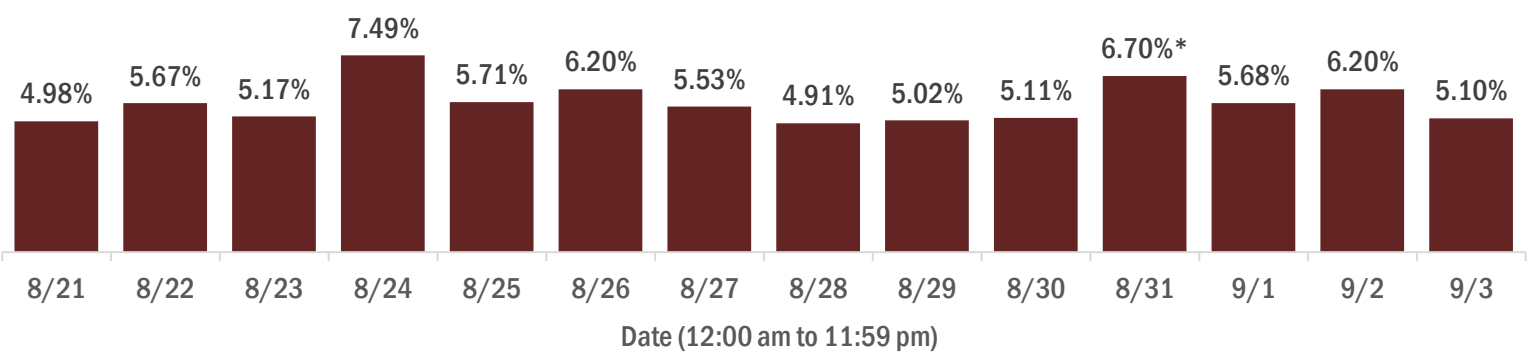

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

### Percent positivity for new cases in Florida residents

The percent of positive results ranged from 4.91% to 7.49% over the past 2 weeks and was 5.10% yesterday.

This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

\* Includes a one-time historical data submission from a large laboratory. The percent positivity on 8/31 excluding the historical data submission was 5.62%. See graph on next page for excess cases by specimen collection date.

# COVID-19: cases and laboratory testing over time

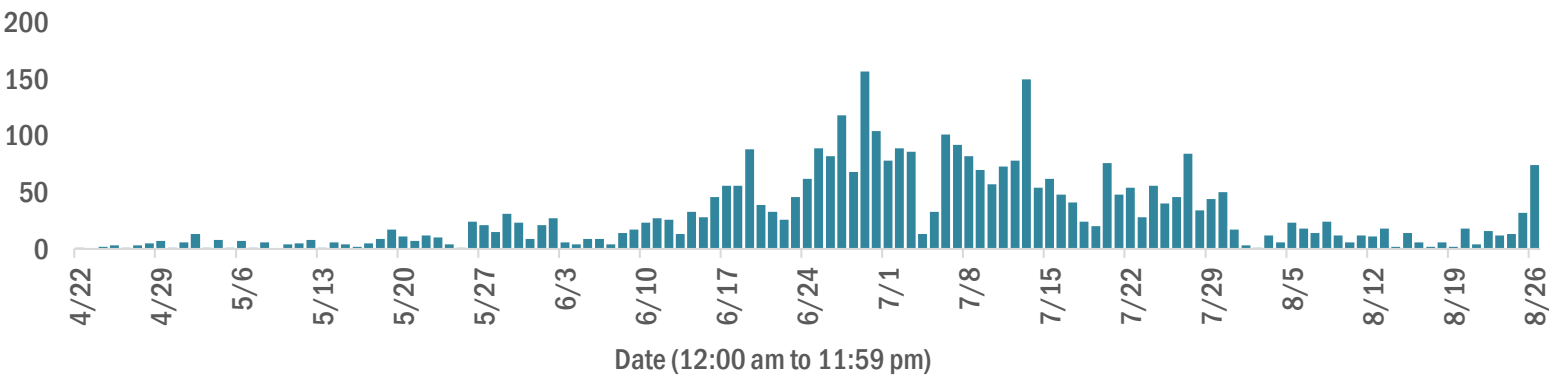

Data through Sep 3, 2020 verified as of Sep 4, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Excess cases counted on 8/31 by specimen collection date

### Number of cases per day

On 8/31, the Department received a one-time historical data submission from a large laboratory resulting in 3,815 cases being created from specimens collected before 8/27. Below is the number of cases by the earliest specimen collection date.

# COVID-19: characteristics of 633,060 Florida resident cases

Data through Sep 3, 2020 verified as of Sep 4, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

# COVID-19: testing by laboratory

Data through Sep 3, 2020 verified as of Sep 4, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through Sep 3, 2020 verified as of Sep 4, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through Sep 3, 2020 verified as of Sep 4, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through Sep 3, 2020 verified as of Sep 4, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**
