

COVID-19: summary of persons monitored, persons tested, and cases

Data through Sep 30, 2020 verified as of Oct 1, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of a airline/ship contact investigation	
Total reports	271,063
Total persons of high, medium, or unknown risk	267,413
High/medium/unknown risk still being monitored	20,343

Persons tested: includes PCR and antigen test results received by the Department of Health from the state public health laboratory (BPHL), as well as commercial and hospital laboratories		
	Florida residents	Non-Florida residents
Total tested	5,311,806	21,211
Positive	700,602	8,542
Negative	4,604,067	12,624
Inconclusive	7,137	45

Cases: people with positive PCR or antigen test result	
Total cases	709,144
Florida residents	700,602
Non-Florida residents	8,542
Type of testing	
Florida residents	700,602
Positive by BPHL/CDC	25,000
Positive by commercial/hospital lab	675,602
PCR positive	683,148
Antigen positive	17,454
Non-Florida residents	8,542
Positive by BPHL/CDC	256
Positive by commercial/hospital lab	8,286
PCR positive	8,061
Antigen positive	481
Characteristics	
Florida residents hospitalized	44,320
Florida resident deaths	14,444
Non-Florida resident deaths	175
Hospitalized counts include anyone who was hospitalized at some point during their illness. It does not reflect the number of people currently hospitalized.	
More information on deaths identified through death certificate data is available on the National Center for Health Statistics website at www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm .	
Risk factors for Florida residents	
Traveled	5,829
Contact with a known case	256,523
Traveled and contact with a known case	6,130
Neither	432,120
No travel and no contact	89,256
Travel is unknown	243,274
Contact is unknown	182,218
Contact is pending	141,852
Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.	

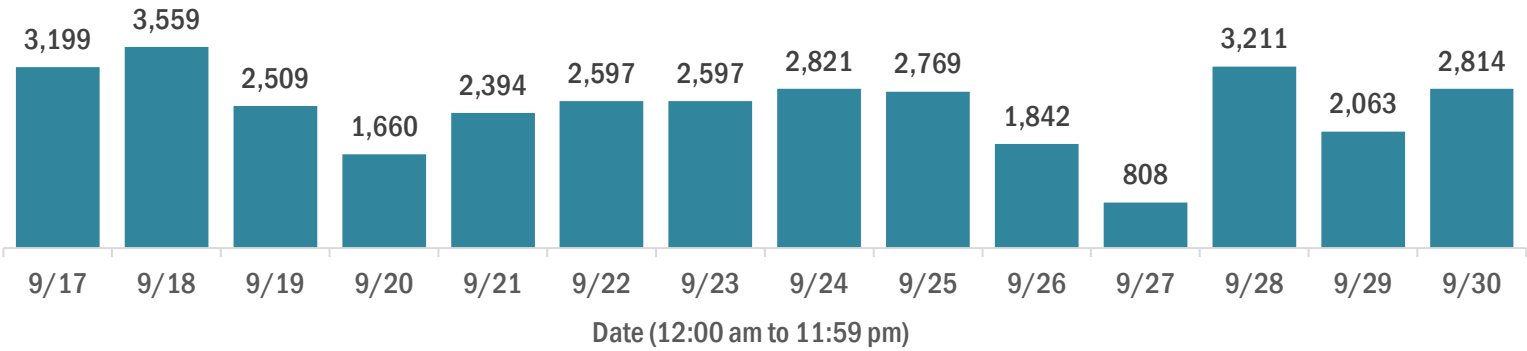

COVID-19: cases and laboratory testing over time

Data through Sep 30, 2020 verified as of Oct 1, 2020 at 09:25 AM

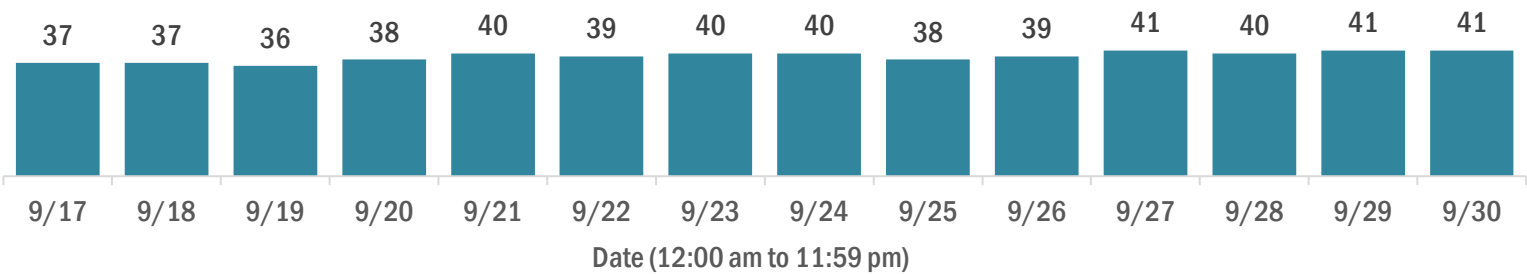

Data in this report are provisional and subject to change.

Cases in Florida residents per day for the past 2 weeks

Number of cases per day

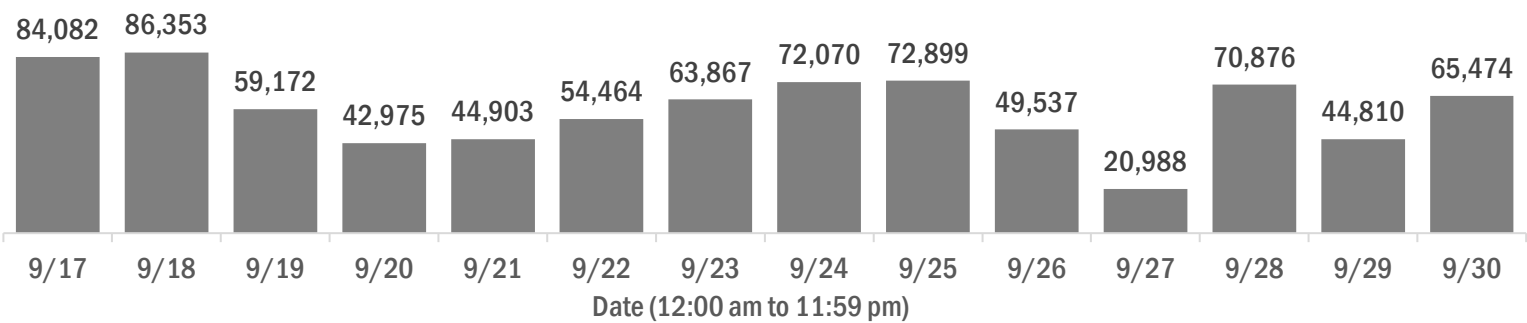

Median age of cases by day

Laboratory testing for Florida residents over the past 2 weeks

Number of Florida residents tested per day

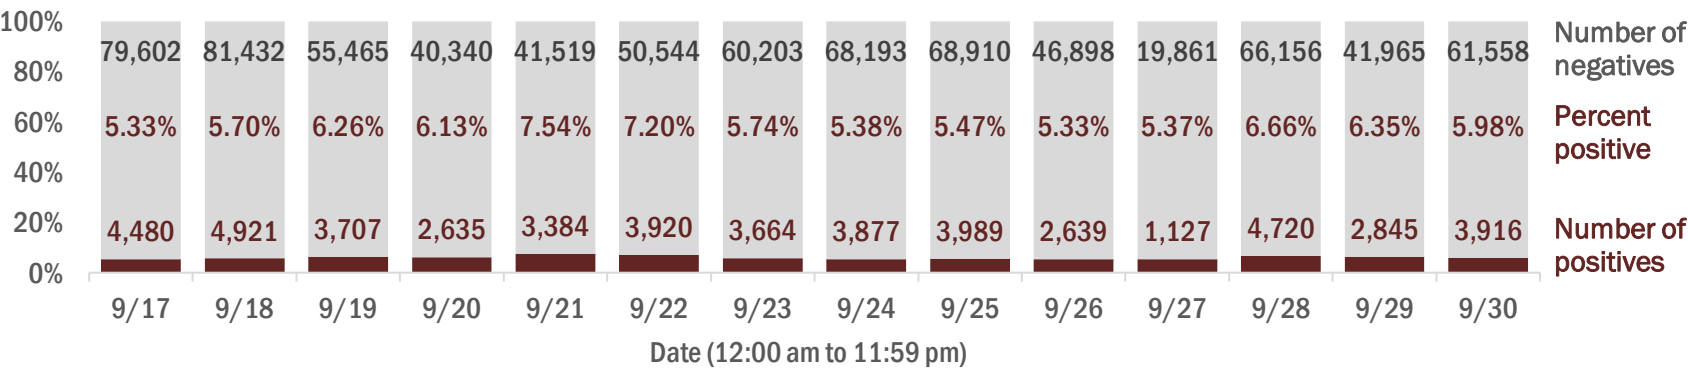

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

Number and percent of Florida residents with positive test results

The percent of positive results ranged from 5.33% to 7.54% over the past 2 weeks and was 5.98% yesterday.

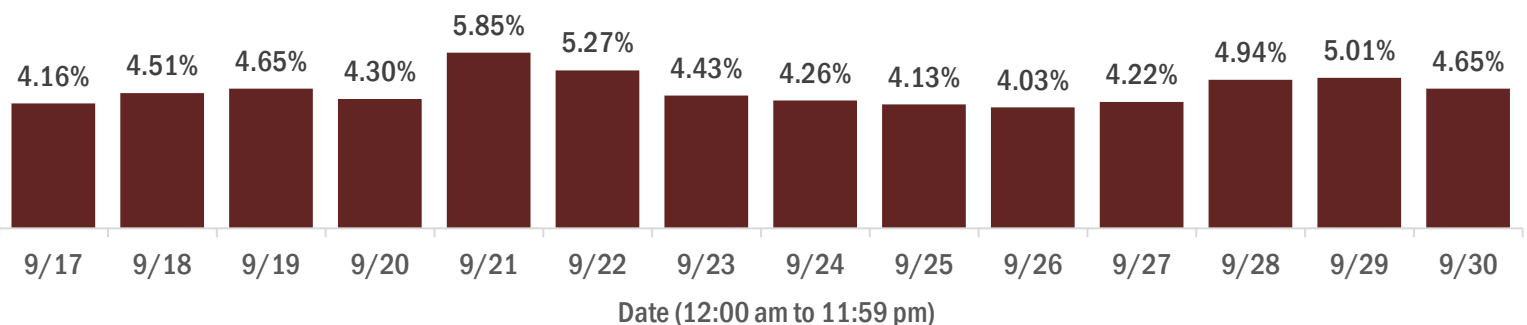

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

Percent positivity for new cases in Florida residents

The percent of positive results ranged from 4.03% to 5.85% over the past 2 weeks and was 4.65% yesterday.

This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

COVID-19: characteristics of 700,602 Florida resident cases

Data through Sep 30, 2020 verified as of Oct 1, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

COVID-19: testing by laboratory

Data through Sep 30, 2020 verified as of Oct 1, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

Reporting lab	Inconclusive	Negative	Positive	Percent positive	Total

COVID-19: testing by laboratory

Data through Sep 30, 2020 verified as of Oct 1, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Sep 30, 2020 verified as of Oct 1, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Sep 30, 2020 verified as of Oct 1, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Sep 30, 2020 verified as of Oct 1, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**
