

COVID-19: summary of persons monitored, persons tested, and cases

Data through Oct 4, 2020 verified as of Oct 5, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of a airline/ship contact investigation	
Total reports	278,358
Total persons of high, medium, or unknown risk	274,713
High/medium/unknown risk still being monitored	19,796

Persons tested: includes PCR and antigen test results received by the Department of Health from the state public health laboratory (BPHL), as well as commercial and hospital laboratories		
	Florida residents	Non-Florida residents
Total tested	5,398,488	21,409
Positive	709,157	8,717
Negative	4,682,162	12,647
Inconclusive	7,169	45

Cases: people with positive PCR or antigen test result	
Total cases	717,874
Florida residents	709,157
Non-Florida residents	8,717
Type of testing	
Florida residents	709,157
Positive by BPHL/CDC	25,273
Positive by commercial/hospital lab	683,884
PCR positive	690,604
Antigen positive	18,553
Non-Florida residents	8,717
Positive by BPHL/CDC	258
Positive by commercial/hospital lab	8,459
PCR positive	8,214
Antigen positive	503
Characteristics	
Florida residents hospitalized	44,775
Florida resident deaths	14,712
Non-Florida resident deaths	174
Hospitalized counts include anyone who was hospitalized at some point during their illness. It does not reflect the number of people currently hospitalized.	
More information on deaths identified through death certificate data is available on the National Center for Health Statistics website at www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm .	
Risk factors for Florida residents	
Traveled	5,950
Contact with a known case	261,410
Traveled and contact with a known case	6,297
Neither	435,500
No travel and no contact	91,063
Travel is unknown	243,300
Contact is unknown	185,933
Contact is pending	139,368
Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.	

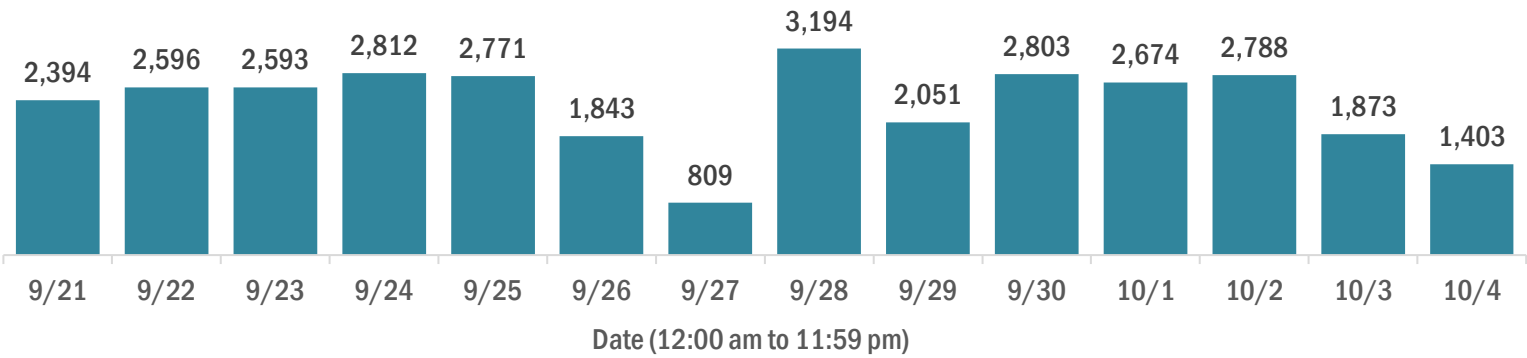

COVID-19: cases and laboratory testing over time

Data through Oct 4, 2020 verified as of Oct 5, 2020 at 09:25 AM

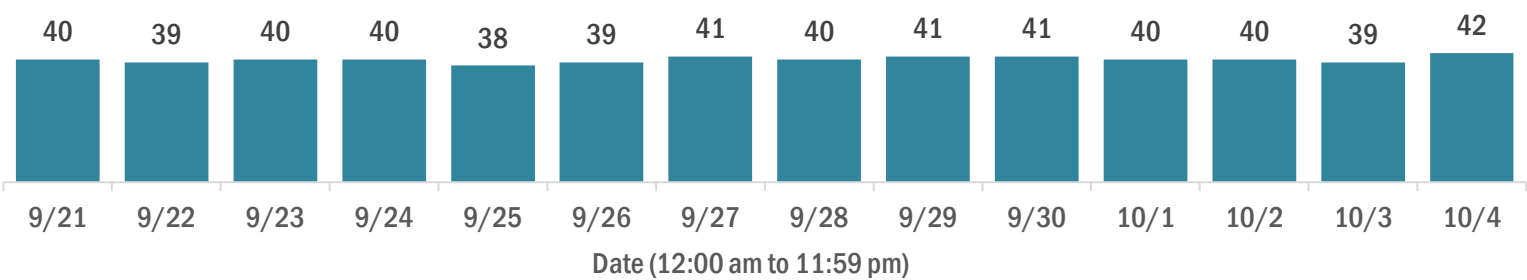

Data in this report are provisional and subject to change.

Cases in Florida residents per day for the past 2 weeks

Number of cases per day

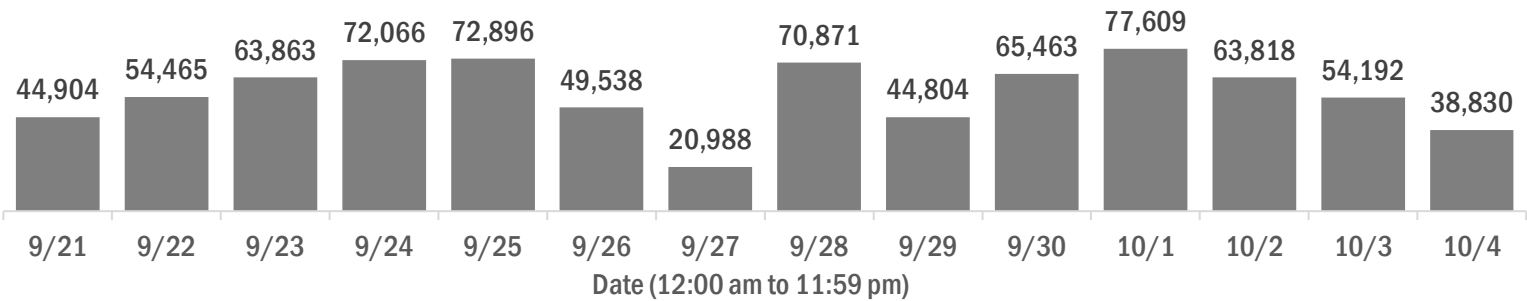

Median age of cases by day

Laboratory testing for Florida residents over the past 2 weeks

Number of Florida residents tested per day

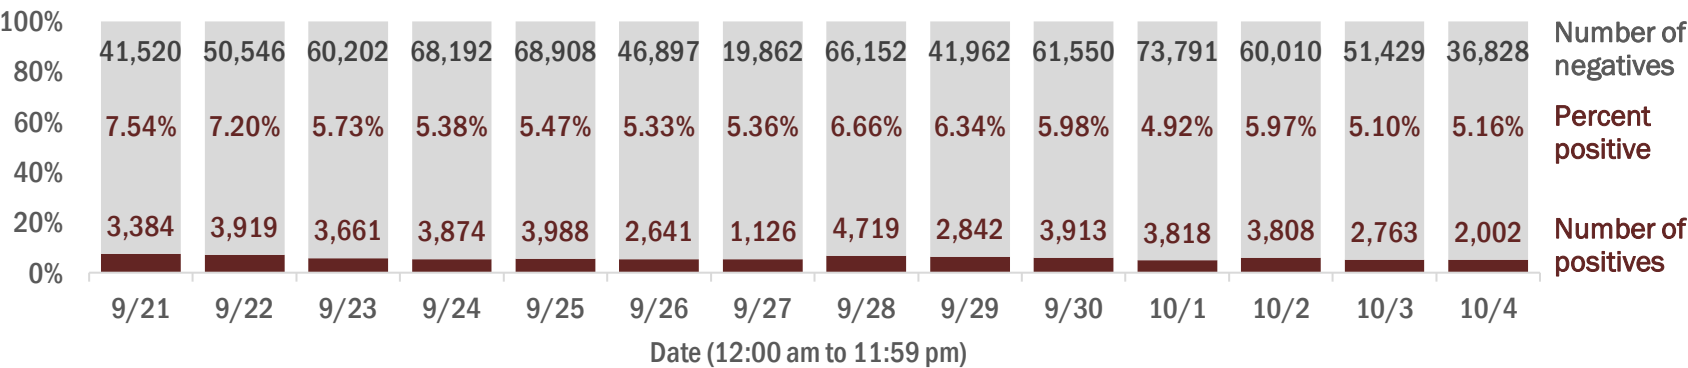

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

Number and percent of Florida residents with positive test results

The percent of positive results ranged from 4.92% to 7.54% over the past 2 weeks and was 5.16% yesterday.

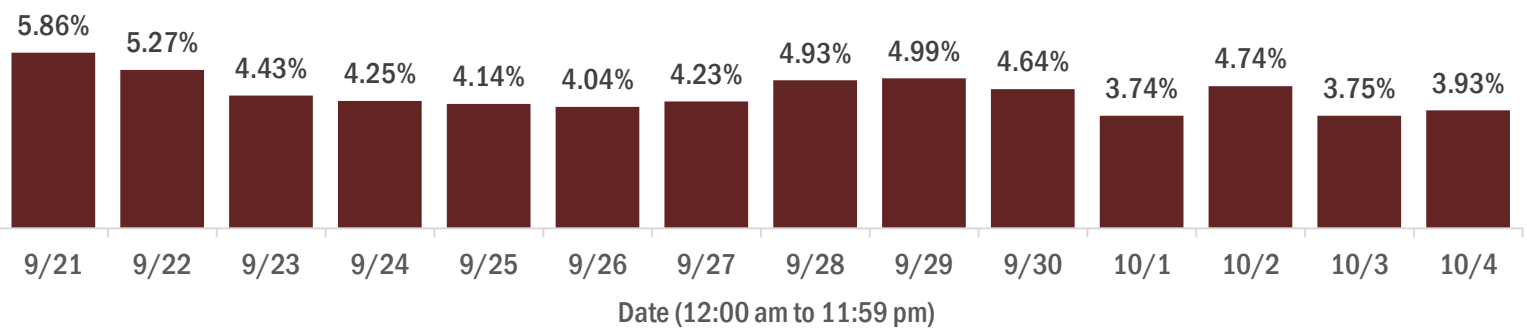

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

Percent positivity for new cases in Florida residents

The percent of positive results ranged from 3.74% to 5.86% over the past 2 weeks and was 3.93% yesterday.

This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

COVID-19: characteristics of 709,157 Florida resident cases

Data through Oct 4, 2020 verified as of Oct 5, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

COVID-19: testing by laboratory

Data through Oct 4, 2020 verified as of Oct 5, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 4, 2020 verified as of Oct 5, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 4, 2020 verified as of Oct 5, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 4, 2020 verified as of Oct 5, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**
