

# COVID-19: summary of persons monitored, persons tested, and cases

Data through Oct 11, 2020 verified as of Oct 12, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of a airline/ship contact investigation	
Total reports	294,959
Total persons of high, medium, or unknown risk	291,319
High/medium/unknown risk still being monitored	21,904

Persons tested: includes PCR and antigen test results received by the Department of Health from the state public health laboratory (BPHL), as well as commercial and hospital laboratories		
	Florida residents	Non-Florida residents
Total tested	5,552,679	21,790
Positive	726,934	9,090
Negative	4,818,605	12,654
Inconclusive	7,140	46

Cases: people with positive PCR or antigen test result	
Total cases	736,024
Florida residents	726,934
Non-Florida residents	9,090
Type of testing	
Florida residents	726,934
Positive by BPHL/CDC	25,946
Positive by commercial/hospital lab	700,988
PCR positive	705,750
Antigen positive	21,184
Non-Florida residents	9,090
Positive by BPHL/CDC	270
Positive by commercial/hospital lab	8,820
PCR positive	8,502
Antigen positive	588
Characteristics	
Florida residents hospitalized	46,015
Florida resident deaths	15,412
Non-Florida resident deaths	187
Hospitalized counts include anyone who was hospitalized at some point during their illness. It does not reflect the number of people currently hospitalized.	
More information on deaths identified through death certificate data is available on the National Center for Health Statistics website at <a href="http://www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm">www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm</a> .	
Risk factors for Florida residents	
Traveled	6,226
Contact with a known case	269,628
Traveled and contact with a known case	6,619
Neither	444,461
No travel and no contact	94,766
Travel is unknown	245,233
Contact is unknown	191,361
Contact is pending	138,716
Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.	

# COVID-19: cases and laboratory testing over time

Data through Oct 11, 2020 verified as of Oct 12, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

## Cases in Florida residents per day for the past 2 weeks

Number of cases per day

7-day average number of cases

Median age of cases by day

## Laboratory testing for Florida residents over the past 2 weeks

### Number of Florida residents tested per day

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

### Number and percent of Florida residents with positive test results

The percent of positive results ranged from 4.43% to 9.24% over the past 2 weeks and was 5.17% yesterday.

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

# COVID-19: cases and laboratory testing over time

Data through Oct 11, 2020 verified as of Oct 12, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

## Laboratory testing for Florida residents over the past 2 weeks

### Percent positivity for new cases in Florida residents

The percent of positive results ranged from 3.44% to 7.87% over the past 2 weeks and was 4.28% yesterday. This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

\* A data dump of previously reported lab results prevented the reporting system from normal processing of lab results on Oct 9, causing an inaccurate representation of data for Oct 9 and 10. The most accurate way to interpret percent positivity for these 2 days is as a 2-day average, which was 4.22%.

### 7-day average percent positivity for new cases in Florida residents

# COVID-19: characteristics of 726,934 Florida resident cases

Data through Oct 11, 2020 verified as of Oct 12, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

# COVID-19: testing by laboratory

Data through Oct 11, 2020 verified as of Oct 12, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

Reporting lab	Inconclusive	Negative	Positive	Percent positive	Total

# COVID-19: testing by laboratory

Data through Oct 11, 2020 verified as of Oct 12, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through Oct 11, 2020 verified as of Oct 12, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through Oct 11, 2020 verified as of Oct 12, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through Oct 11, 2020 verified as of Oct 12, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through Oct 11, 2020 verified as of Oct 12, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through Oct 11, 2020 verified as of Oct 12, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**
