

# COVID-19: summary of persons monitored, persons tested, and cases

Data through Oct 14, 2020 verified as of Oct 15, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of a airline/ship contact investigation	
Total reports	304,809
Total persons of high, medium, or unknown risk	301,170
High/medium/unknown risk still being monitored	24,208

Persons tested: includes PCR and antigen test results received by the Department of Health from the state public health laboratory (BPHL), as well as commercial and hospital laboratories		
	Florida residents	Non-Florida residents
Total tested	5,628,675	22,049
Positive	735,685	9,303
Negative	4,885,833	12,700
Inconclusive	7,157	46

Cases: people with positive PCR or antigen test result	
Total cases	744,988
Florida residents	735,685
Non-Florida residents	9,303
Type of testing	
Florida residents	735,685
Positive by BPHL/CDC	26,334
Positive by commercial/hospital lab	709,351
PCR positive	712,788
Antigen positive	22,897
Non-Florida residents	9,303
Positive by BPHL/CDC	275
Positive by commercial/hospital lab	9,028
PCR positive	8,652
Antigen positive	651
Characteristics	
Florida residents hospitalized	46,693
Florida resident deaths	15,736
Non-Florida resident deaths	196
Hospitalized counts include anyone who was hospitalized at some point during their illness. It does not reflect the number of people currently hospitalized.	
More information on deaths identified through death certificate data is available on the National Center for Health Statistics website at <a href="http://www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm">www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm</a> .	
Risk factors for Florida residents	
Traveled	6,402
Contact with a known case	274,494
Traveled and contact with a known case	6,811
Neither	447,978
No travel and no contact	96,735
Travel is unknown	244,880
Contact is unknown	193,925
Contact is pending	137,570
Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.	

# COVID-19: cases and laboratory testing over time

Data through Oct 14, 2020 verified as of Oct 15, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

## Cases in Florida residents per day for the past 2 weeks

Number of cases per day

7-day average number of cases

Median age of cases by day

## Laboratory testing for Florida residents over the past 2 weeks

### Number of Florida residents tested per day

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

### Number and percent of Florida residents with positive test results

The percent of positive results ranged from 4.43% to 9.24% over the past 2 weeks and was 6.70% yesterday.

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

# COVID-19: cases and laboratory testing over time

Data through Oct 14, 2020 verified as of Oct 15, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

## Laboratory testing for Florida residents over the past 2 weeks

### Percent positivity for new cases in Florida residents

The percent of positive results ranged from 3.43% to 7.86% over the past 2 weeks and was 5.20% yesterday. This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

\* A data dump of previously reported lab results prevented the reporting system from normal processing of lab results on Oct 9, causing an inaccurate representation of data for Oct 9 and 10. The most accurate way to interpret percent positivity for these 2 days is as a 2-day average, which was 4.21%.

### 7-day average percent positivity for new cases in Florida residents

# COVID-19: characteristics of 735,685 Florida resident cases

Data through Oct 14, 2020 verified as of Oct 15, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

# COVID-19: characteristics of 735,685 Florida resident cases

Data through Oct 14, 2020 verified as of Oct 15, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The table below includes the cities and counties of residence for cases in Florida residents based on the patient's ZIP Code.

Note that city is not always received as part of the initial notification and may be missing while the case is being investigated.

City and county	Cases
Miami, Dade	100,139
Orlando, Orange	31,464
Jacksonville, Duval	29,637
Tampa, Hillsborough	26,119
Hialeah, Dade	24,371

Data through Oct 14, 2020 verified as of Oct 15, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through Oct 14, 2020 verified as of Oct 15, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through Oct 14, 2020 verified as of Oct 15, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through Oct 14, 2020 verified as of Oct 15, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**
