COVID-19: summary of persons monitored, persons tested, and cases

Data through Oct 15, 2020 verified as of Oct 16, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of a airline/ship contact investigation

Total reports	307,943
Total persons of high, medium, or unknown risk	304,306
High/medium/unknown risk still being monitored	24,836

Persons tested: includes PCR and antigen test results received by the Department of Health from the state public health laboratory (BPHL), as well as commercial and hospital laboratories

	Florida residents	Non-Florida residents
Total tested	5,658,780	22,137
Positive	739,050	9,387
Negative	4,912,544	12,704
Inconclusive	7,186	46

Cases: people with positive PCR or antigen test result	
Total cases	748,437
Florida residents	739,050
Non-Florida residents	9,387
Type of testing	
Florida residents	739,050
Positive by BPHL/CDC	26,490
Positive by commercial/hospital lab	712,560
PCR positive	715,492
Antigen positive	23,558
Non-Florida residents	9,387
Positive by BPHL/CDC	276
Positive by commercial/hospital lab	9,111
PCR positive	8,716
Antigen positive	671
Characteristics	
Florida residents hospitalized	46,862
Florida resident deaths	15,830
Non-Florida resident deaths	200
Handisal and an object of a new and office of a second of the contract of the	: 4

Hospitalized counts include anyone who was hospitalized at some point during their illness. It does not reflect the number of people currently hospitalized.

More information on deaths identified through death certificate data is available on the National Center for Health Statistics website at www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm.

Risk factors for Florida residents

Traveled	6,442
Contact with a known case	276,066
Traveled and contact with a known case	6,864
Neither	449,678
No travel and no contact	97,302
Travel is unknown	245,588
Contact is unknown	194,760
Contact is pending	137,817

Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.

COVID-19: cases and laboratory testing over time

Data through Oct 15, 2020 verified as of Oct 16, 2020 at 09:25 AM

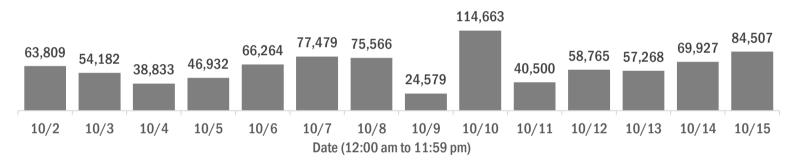

Data in this report are provisional and subject to change.

Laboratory testing for Florida residents over the past 2 weeks

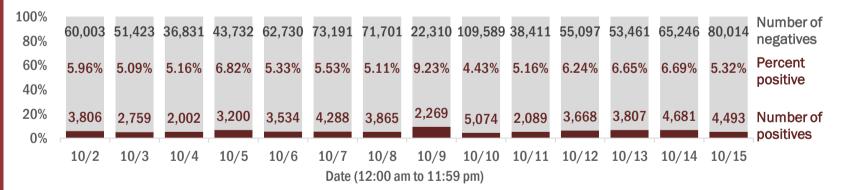

Number of Florida residents tested per day

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

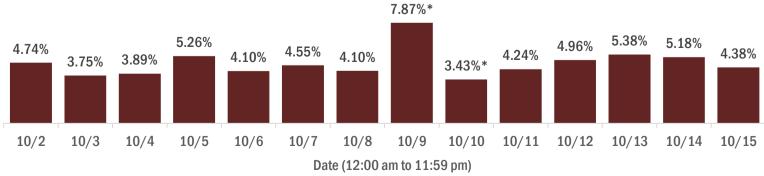

Number and percent of Florida residents with positive test results

The percent of positive results ranged from 4.43% to 9.23% over the past 2 weeks and was 5.32% yesterday. These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

Percent positivity for new cases in Florida residents

The percent of positive results ranged from 3.43% to 7.87% over the past 2 weeks and was 4.38% yesterday. This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

^{*} A data dump of previously reported lab results prevented the reporting system from normal processing of lab results on Oct 9, causing an inaccurate representation of data for Oct 9 and 10. The most accurate way to interpret percent positivity for these 2 days is as a 2-day average, which was 4.21%.

Data through Oct 15, 2020 verified as of Oct 16, 2020 at 09:25 AM

Data in this report are provisional and subject to change.
