

COVID-19: summary of persons monitored, persons tested, and cases

Data through Oct 20, 2020 verified as of Oct 21, 2020 at 01:25 PM

Data in this report are provisional and subject to change.

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of a airline/ship contact investigation	
Total reports	321,154
Total persons of high, medium, or unknown risk	317,519
High/medium/unknown risk still being monitored	26,110

Persons tested: includes PCR and antigen test results received by the Department of Health from the state public health laboratory (BPHL), as well as commercial and hospital laboratories		
	Florida residents	Non-Florida residents
Total tested	5,763,829	22,476
Positive	752,845	9,689
Negative	5,003,748	12,738
Inconclusive	7,236	49

Cases: people with positive PCR or antigen test result	
Total cases	762,534
Florida residents	752,845
Non-Florida residents	9,689
Type of testing	
Florida residents	752,845
Positive by BPHL/CDC	27,113
Positive by commercial/hospital lab	725,732
PCR positive	726,989
Antigen positive	25,856
Non-Florida residents	9,689
Positive by BPHL/CDC	280
Positive by commercial/hospital lab	9,409
PCR positive	8,926
Antigen positive	763
Characteristics	
Florida residents hospitalized	47,628
Florida resident deaths	16,210
Non-Florida resident deaths	203
Hospitalized counts include anyone who was hospitalized at some point during their illness. It does not reflect the number of people currently hospitalized.	
More information on deaths identified through death certificate data is available on the National Center for Health Statistics website at www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm .	
Risk factors for Florida residents	
Traveled	6,669
Contact with a known case	283,143
Traveled and contact with a known case	7,145
Neither	455,888
No travel and no contact	100,196
Travel is unknown	246,454
Contact is unknown	198,426
Contact is pending	137,104
Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.	

COVID-19: cases and laboratory testing over time

Data through Oct 20, 2020 verified as of Oct 21, 2020 at 01:25 PM

Data in this report are provisional and subject to change.

Cases in Florida residents per day for the past 2 weeks

Number of cases per day

Median age of cases by day

Laboratory testing for Florida residents over the past 2 weeks

Number of Florida residents tested per day

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

Number and percent of Florida residents with positive test results

The percent of positive results ranged from 4.42% to 9.23% over the past 2 weeks and was 8.03% yesterday.

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

Percent positivity for new cases in Florida residents

The percent of positive results ranged from 3.43% to 7.87% over the past 2 weeks and was 6.74% yesterday.

This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

* A data dump of previously reported lab results prevented the reporting system from normal processing of lab results on Oct 9, causing an inaccurate representation of data for Oct 9 and 10. The most accurate way to interpret percent positivity for these 2 days is as a 2-day average, which was 4.21%.

COVID-19: characteristics of 752,845 Florida resident cases

Data through Oct 20, 2020 verified as of Oct 21, 2020 at 01:25 PM

Data in this report are provisional and subject to change.

COVID-19: testing by laboratory

Data through Oct 20, 2020 verified as of Oct 21, 2020 at 01:25 PM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 20, 2020 verified as of Oct 21, 2020 at 01:25 PM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 20, 2020 verified as of Oct 21, 2020 at 01:25 PM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 20, 2020 verified as of Oct 21, 2020 at 01:25 PM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 20, 2020 verified as of Oct 21, 2020 at 01:25 PM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**
