Weekly SARS-CoV-2 IgG and total antibody results for Florida

Data through Aug 20, 2020 verified as of Aug 21, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Results are reported from commercial laboratory doing serologic testing for COVID-19 IgG or total antibody (IgM and IgG). The performance of the individual commercial laboratory tests used is not known.

For further information about antibody testing please visit the CDC website:
The numbers in the table below represent the number for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. Therefore, the sum of the numbers in each column will be larger than the total number of people tested.

Weekly SARS-CoV-2 IgG and total antibody results for Florida

Data through Aug 20, 2020 verified as of Aug 21, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. Therefore, the sum of the numbers in each column will be larger than the total number of people tested.

## Weekly SARS-CoV-2 IgG and total antibody results for Florida

Data through Aug 20, 2020 verified as of Aug 21, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Results are reported from commercial laboratory doing serologic testing for COVID-19 IgG or total antibody (IgM and IgG). The performance of the individual commercial laboratory tests used is not known.

This table is the total number of people tested. Persons who had more than one specimen tested will only appear once in this table. If a person had a positive result and a negative result, they will be counted as positive. People are only counted as inconclusive if they did not have a positive or negative result.
