

The *Aedes aegypti* mosquito spreads Zika virus which can cause serious health issues.

**Passengers,
if you are traveling to a
tropical country
you could be exposed to
ZIKA VIRUS
from mosquito bites
& not know it.**

COVER your skin

Use EPA-registered insect repellents with DEET.

Wear protective clothing: long sleeves, long pants and socks.

DRAIN standing water

Be helpful to your host country.
If you see standing water outside,
drain it.

Your **RETURN** home

Prevent spreading Zika to others
& avoid mosquito bites. Follow the
COVER & DRAIN message!
