

This mosquito can carry the viruses that cause **dengue, chikungunya & Zika.**

Because you work outside, protect yourself.

COVER Your Skin

USE MOSQUITO REPELLENT Follow label directions. Pay attention to how long the protection lasts. Put repellent directly on your skin or on your clothing—not under your clothing. Sunscreen goes on first, then repellent.

USE REPELLENTS THAT WORK OFF, Cutter, Sawyer, Ultrathon, Skin So Soft Bug Guard Plus, Autan, Repel, Skin Smart.

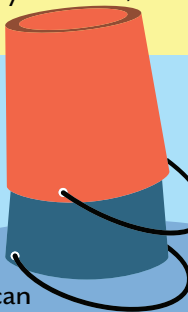

COVER YOUR SKIN WITH CLOTHING Wear long-sleeve shirts and long pants. Mosquitoes can bite through thin clothing.

SPRAY PERMETHRIN ON GEAR & CLOTHING This insecticide kills mosquitoes and other insects. It's used to treat clothing and work gear. **DO NOT SPRAY IT ON YOUR SKIN.**

AT HOME Mosquitoes can live indoors and will bite at any time, day or night. Doors and windows must have screens in good repair. If you sleep in a room that has damaged screens, or if you sleep outside for your work, use a mosquito bed net.

DRAIN Water

MOSQUITOES BREED IN STANDING WATER Drain garbage cans, buckets, coolers, equipment backpacks, flower pots, or any containers where sprinkler or rain water has collected. Anything outside that can hold water should be stored inside or thrown away. Fix leaky pipes around buildings. If your septic tank or seal is damaged, call a registered septic contractor.
