

A booster shot is administered to increase the immune response of people who have completed the recommended number of initial doses for a COVID-19 vaccine.

WHO CAN GET A COVID-19 BOOSTER SHOT?

You can choose the Pfizer, Moderna, or J&J COVID-19 vaccine for your booster shot **regardless** of which vaccine you initially received.

People should talk to their health care provider about whether a booster shot is appropriate for them.

Scan the code for more booster shot guidance from the CDC.

Find a vaccine near you at FloridaHealthCOVID19.gov or scan the QR code.

A booster shot will increase your immune response.

**YOU CAN GET THE PFIZER, MODERNA, OR THE J&J
COVID-19 VACCINE BOOSTER SHOT IF:**

**You received 2 doses of the Pfizer or Moderna
vaccine over 6 months ago and**

You're age 65 and older.

Or you're age 18 and older, and you:

- Live in a long-term care setting,
- Have an underlying medical condition, or
- You work and/or live in a high-risk setting.

OR

**You're age 18 and older and you received the J&J
vaccine over 2 months ago.**

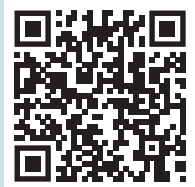

**You can choose the Pfizer, Moderna, or
J&J COVID-19 vaccine for your booster shot **regardless** of
which vaccine you initially received.**

**People should talk to their health care provider about
whether a booster shot is appropriate for them.**

An additional dose is administered to improve moderately to severely immunocompromised people's immune response to their initial two-dose series of the Pfizer or Moderna COVID-19 vaccine.

Who can get an additional dose of the Pfizer and Moderna COVID-19 vaccine?

Did you receive 2 doses of the Pfizer COVID-19 vaccine over 28 days ago?

Yes

Are you moderately or severely immunocompromised?*

Yes

Are you 12 or older?

Yes

You can get an additional dose of the Pfizer COVID-19 vaccine.

Did you receive 2 doses of the Moderna COVID-19 vaccine over 28 days ago?

Yes

Are you moderately or severely immunocompromised?*

Yes

Are you 18 or older?

Yes

You can get an additional dose of the Moderna COVID-19 vaccine.

You should use the same COVID-19 vaccine (Pfizer or Moderna) that you received initially for your additional dose. Unlike a COVID-19 booster shot, the Pfizer and Moderna vaccines are not interchangeable for an additional dose.

People should talk to their health care provider about whether a booster shot is appropriate for them.

At this time, an additional dose is not recommended for people who received the J&J COVID-19 vaccine.

*Scan the code for more on immunocompromised conditions, from the CDC.
