

Research shows that children's earliest experiences play a critical role in brain development.

early steps

We help families build on their child's individual strengths and provide supports to meet the child's unique needs where they live, learn and play.

CORE VALUES

Each child is unique.

Every family's needs are different.

Early intervention works best when the family is supported in meeting their child's needs.

The parent, family or caregiver is the child's best teacher.

Honoring a family's strengths, beliefs, culture and values.

Children learn best in settings that include all children.

Anyone can refer a child to Early Steps.
