Florida's School-Based Sealant Program

Sealing Sunny Smiles Across Florida

Dental sealants can help prevent permanent teeth from getting cavities.

Good news for smiles! A sealant is a thin plastic coating that keeps food and germs out of the grooves and chewing surfaces of teeth. Sealants are applied by a licensed or certified dental professional. The procedure is easy, painless and is covered by most insurance plans.

Good news for Florida smiles! The Florida Department of Health in your county may offer dental sealants through your public school. For more information about dental sealants and School-Based Dental Sealants Programs, visit www.flhealth.gov/sealants.
